

An overview of who we are, what we do and what makes us a trusted partner for Local Authorities and Mobile Network Operators.

Small Cells

Cellnex and how we work with Local Authorities

We create **innovative shared connectivity solutions** to grow UK wireless networks efficiently and sustainably

Cellnex UK is **integral to 5G deployment**, forecast to grow to 29m connections by 2025

Trusted partner of **all the major UK mobile network operators**, hundreds of private businesses, the emergency services and the government

We are the UK's **leading cell site provider** and independent wireless connectivity infrastructure company

We are helping to create a **safer, greener, more connected and prosperous UK**

European scale across 11 countries

Europe's **largest and fastest-growing** independent wireless infrastructure provider

>110,000
sites today

c.135,000
sites by 2030

Present in 11 countries, **€4bn turnover** and member of IBEX 35

Delivering **shared economic & environmental benefit** is at the heart of what Cellnex does

Own and operate **19 mission critical TETRA networks** in Spain and a **full MNO RAN** in Poland

Benefits to Local Authorities

Business as Usual

Small cells are used across the UK as a matter of course to improve service – making assets available is the best way to ensure operators prioritise your authority for investment.

Agreements

An agreement supports digital strategies. It enhances other courses of action while providing improvements. It is also an excellent starting point for further partnerships with Cellnex!

Underpin Services and Growth

Small cells underpin essential services for residents and visitors, drives business investment resulting in economic growth, regeneration and authority revenue streams.

Access for All

Best means to support less advantaged residential areas – create the low friction conditions for an MNO to provide service.

Convenient

We do all the work and pay you for what we use. Making it simple to set up and administer.

Long term

Mobile and telecoms services are generally long-term arrangements.

‘Creating certainty is the best way to get mobile operator investment and service benefits’

Thank you
